Digital Transformation and Business Automation Professional with experience supporting the World Food Programme (WFP) through the development of low-code solutions using Microsoft Power Platform, including Power Apps, Power Automate, and SharePoint. Skilled in analyzing business requirements, automating workflows, improving data governance, and delivering technology solutions that enhance operational efficiency and user experience. Backed by a strong foundation in Data Analytics and Full Stack Web Development, with expertise in Python, SQL, JavaScript, React, and Django acquired through specialized courses and practical projects. Experienced in data analysis, visualization, process optimization, and solution development, with a strong commitment to leveraging technology to drive organizational effectiveness and digital transformation.

WORK EXPERIENCE

UN WFP - Digital Solutions (Business Transformation) Volunteer

July 2026 - September 2026

- Develop and maintain low-code business solutions using Microsoft Power Platform (Power Apps, Power Automate, and SharePoint) to support organizational processes and operational efficiency.
- Design and customize SharePoint-based applications, forms, and workflows to streamline data collection, document management, and reporting.
- Automate business processes and notifications through Power Automate, reducing manual effort and improving process consistency.
- Build interactive dashboards, data-driven interfaces, and user-friendly solutions tailored to business requirements.
- Collaborate with stakeholders to gather requirements, troubleshoot technical issues, and implement digital transformation initiatives.
- Support the administration and enhancement of internal information systems, ensuring data accuracy, accessibility, and compliance with organizational standards.

Key Achievement: Developed and enhanced business continuity and operational management solutions using Microsoft Power Platform, enabling automated workflows, centralized data management, PDF reporting, email automation, and improved user experience across organizational processes.
